Attorney Docket No. TS0777/US

12. (Previously Presented): A bituminous composition for use in a self adhesive shingle or roofing felt, said composition comprising a bituminous component and a block copolymer, said block copolymer comprising at least two blocks of a conjugated diene and at least two blocks of a monovinylaromatic hydrocarbon of the general formula:

wherein  $B_1$  is a block of polymerized conjugated diene comprising at least 80 mole% isoprene having an apparent molecular weight of from 180,000 to 400,000,  $S_1$  and  $S_2$  are blocks of polymerized monovinylaromatic hydrocarbon comprising at least 99 mole % styrene and having a weight average molecular weight of 12,000 to 40,000, and  $B_2$  is a block of polymerized conjugated diene comprising at least 80 mole% isoprene having an apparent molecular weight of from 15,000 to 60,000; wherein the weight ratio  $W$  of  $B_1$  over  $B_2$  is in the range of 3.0 to 12.0; and wherein the content of polymerized monovinylaromatic hydrocarbon is in the range from 10 to 35 %wt.

13. (Canceled)

14. (Previously Presented): The bituminous composition of claim 12, wherein polymer blocks  $B_1$  and  $B_2$  each independently comprise at least 99 mole% isoprene.

15. (Canceled)

16. (Canceled)

17. (Previously Presented): The bituminous composition of claim 12, wherein polymer block  $B_1$  has an apparent molecular weight of from 250,000 to 350,000.

18. (Previously Presented): The bituminous composition of claim 12, wherein polymer blocks  $S_1$  and  $S_2$  each independently have a molecular weight of from 20,000 to 35,000.

Attorney Docket No. TS0777/US

19. (Previously Presented): The bituminous composition of claim 12, wherein the weight ratio W is in the range of from about 4.0 to about 8.0.

20. (Previously Presented): The bituminous composition of claim 12, wherein the weight ratio W is about 6.0.

21. (Previously Presented): The bituminous composition of claim 12, which comprises on the total weight of the bituminous composition from 70 to 95 w% of the bituminous component and from 30 to 5 w% of the block copolymer.

22. (Previously Presented): The bituminous composition of claim 12, wherein the bituminous component has a penetration of less than 300 drnm (decamillimeters) at 25 °C.

23. (Previously Presented): A block copolymer which comprises at least two blocks of a conjugated diene and at least two blocks of a monovinylaromatic hydrocarbon, being of the general formula:

wherein B<sub>1</sub> is a block of polymerized conjugated diene comprising at least 80 mole% isoprene having an apparent molecular weight of from 180,000 to 400,000, S<sub>1</sub> and S<sub>2</sub> are blocks of polymerized monovinylaromatic hydrocarbon comprising at least 99 mole% styrene and having a weight average molecular weight of 12,000 to 40,000, and B<sub>2</sub> is a block of polymerized conjugated diene comprising at least 80 mole% isoprene having an apparent molecular weight of from 15,000 to 60,000; wherein the weight ratio W of B<sub>1</sub> over B<sub>2</sub> is in the range of 3.0 to 12.0; and wherein the content of polymerized monovinylaromatic hydrocarbon is in the range from 10 to 35 %wt.

24. (Canceled)

Attorney Docket No. TS0777/US

25. (Previously Presented): A coating comprising a bituminous composition that comprises a bituminous component and a block copolymer, said block copolymer comprising at least two blocks of a conjugated diene and at least two blocks of a monovinylaromatic hydrocarbon of the general formula:

wherein  $B_1$  is a block of polymerized conjugated diene comprising at least 80 mole% isoprene having an apparent molecular weight of from 180,000 to 400,000,  $S_1$  and  $S_2$  are blocks of polymerized monovinylaromatic hydrocarbon comprising at least 80 mole% styrene and having a weight average molecular weight of 12,000 to 40,000, and  $B_2$  is a block of polymerized conjugated diene comprising at least 80 mole% isoprene having an apparent molecular weight of from 15,000 to 60,000; wherein the weight ratio  $W$  of  $B_1$  over  $B_2$  is in the range of 3.0 to 12.0; and wherein the content of polymerized monovinylaromatic hydrocarbon is in the range from 10 to 35 %wt.

26. (Canceled)

27. (Currently Amended): The bituminous composition of claim 21, wherein polymer blocks  $B_1$  and  $B_2$  each independently comprise at least 99 mole% isoprene and the weight ratio  $W$  is in the range of from about 4.0 to about 8.0, polymer block  $B_1$  has an apparent molecular weight of from 250,000 to 350,000, polymer blocks  $S_1$  and  $S_2$  each independently have a molecular weight of from 20,000 to 35,000, ~~and wherein.~~
